

## Gus 67554

- Name:* Gus  
*Number:* 67554  
*Age:* 10 years 8 months  
*Gender:* Male  
*Cars:* Loves to go on adventures. Well behaved in the car.  
*Cats:* Being fostered with a kitty. Understands good behavior but will chase if cat is not dog savvy.  
*Kids:* Typical golden. No issues  
*Other Dogs:* No issues with dogs  
*Owner Exp.:* Medium only because he has a road to recovery with skin, eyes and ears.  
*Home Alone:* Can be home alone during the day. His fosters are in and out throughout the day.

My name is Gus and I am now 10 1/2 yo old after being in rescue since July. I have some updated pictures so check me out. I am your typical golden. Love people, kids, dogs and cats. I am happiest when I am with my people and love going on adventures. In a car and I will go with you anywhere. When I came into rescue, I was a mess. I am allergic to fleas and other environmental elements. I have been on some great tasty grain free food and treated for fleas monthly with Simparica. NGRR has continued to treat me with fungal and steroid medications and weekly baths. I look and feel so much better. Let's talk about my special needs: I was also diagnosed with KCS, keratoconjunctivitis sicca, or dry eye in the right eye. I will need to continue with the Optimmune and artificial tears. Optimmune costs approx. \$34 and last 2-3 months. They keep trying to get me off the steroids and fungal medications but then I get itchy. The ketoconazole (fungal) is \$48.00 a month and the Prednisone is \$45 every 2 months. My medical could be \$1,000 a year. I will need a loving home prepared to manage a golden retriever with chronic skin and eye issues
