Charolette is down to a mere 98.5 pounds! That's 5 pounds gone, 20-ish more to go. She's not able to go for long walks because of limited range of motion in her elbows and shoulders, and she has suspected old partial tears of her CCLs bilaterally and a meniscal tear on one side. She waddles with a smile on her face, though! She's on anti-inflammatories and receives Adequan injections for her joints.
